Patient Information

Client: Miller, Nicole Patient Name: Ranger Reg. Name: Labradoodles of Montana Lone Ranger PennHIP Num: 168411 Species: Canine Date of Birth: 25 May 2021 Sex: Male Date of Study: 02 Feb 2022 Date of Report: 03 Feb 2022	Tattoo Num: Patient ID: Ranger Registration Num: Microchip Num: 956000014065072 Breed: LABRADOODLE Age: 9 months Weight: 20.5 lbs/9.3 kgs Date Submitted: 02 Feb 2022
--	--

Findings

Distraction Index (DI): Right DI = 0.45, Left DI = 0.44. Osteoarthritis (OA): No radiographic evidence of OA for either hip. Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.45.
 OA Risk Category: The DI is between 0.31 and 0.49. This patient is at mild risk for hip OA.
 Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 9894 canine patients of the LABRADOODLE breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.31 - 0.75) for the breed. The breed average DI is 0.50 (solid square). The patient DI is the solid circle (0.45).

SUMMARY: The degree of laxity (DI = 0.45) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a mild risk to develop hip OA. **No radiographic evidence of OA for either hip.**
